Vision - Mission - Values

Vision

- Our vision is to become the leading technology partner, working alongside your business to achieve sustainable success together.

Mission

- Creating software products that are easy to use, friendly and bring the best user experience, helping them achieve the highest efficiency in work and life.
- Supporting your businesses and organizations in their digital transformation journey, from strategic consulting to implementing specific solutions.
- Providing comprehensive software solutions, from mobile application development to business management systems, meeting all customer needs.

Core Values

- **Creativity:** Encourage a spirit of creativity throughout the entire company, from product development to management and operations.
- **Quality and reliability:** Committed to providing high quality, reliable and safe products and services.
- **Cooperation and sharing:** Build sustainable cooperative relationships with customers, partners and communities, share success and grow together.
- **Ethics and transparency:** Do business with transparency and ethics, building trust and reputation in the market.

Services of Bavaan

IT & Software Consulting

We help advise on technology-based solutions and plan dedicated resources to develop the most suitable IT strategies for businesses.

eCommerce Development

Develop eCommerce solutions on leading platforms (such as **Magento, Shopify, Bigcommerce**), helping businesses interact and attract customers with low operating costs and better profits.

Digital Transformation

Bavaan evaluates and analyzes the current state of information technology infrastructure, making recommendations on implementation roadmaps and solutions to meet short, medium and long-term business goals. Bavaan leverages the latest technologies for intelligent process automation and competitive differentiation for businesses/organizations.

Custom Development

We build software solutions based on customer needs to solve problems. Our software development services help startups, mid-sized and large enterprises build software solutions that meet their business goals.

Other Services

ODC

ODC (Offshore Development Center) is ideal for companies that do not have an in-house IT department capable of performing the entire software development cycle and want to outsource the entire IT process on a Bavaan basis.

Product Development

Turn your ideas into innovative solutions, accelerate time to market, and gain a competitive advantage with comprehensive software product development services from Bavaan. We bring all our knowledge to bring value to end users and ensure your business growth.

Website Development

We develop the highest quality, reliable, customized and user-friendly web applications that fit your business needs. Use leading technologies to turn your vision into reality and achieve sustainable business growth

Mobile App Development

We create custom mobile solutions that perfectly align with your vision and mission. Our team of passionate experts deliver powerful, results-driven applications that help your brand lead the mobile revolution.

Other Services

IT application investment consulting

Information technology application investment consulting is a set of activities related to research, spending capital to purchase, hire information technology services, set up new, expand or upgrade the system. technical infrastructure, software, and database systems to develop, maintain, and improve product and service quality and operational efficiency within a certain period of time.

System integration

“System integration” helps connect discrete subsystems and different application software by using connection techniques such as computer networks, application integration, process management, and programming. .. System integration is also a process that helps increase the value and capacity of the parent system through synergistic interactions between subsystems.

Commitment and Support

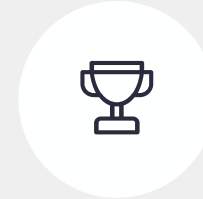

Commitment

Optimize investment efficiency.
Providing solutions, advanced
technology, and professional
services.

Effectively use and manage
customer resources

Speed up project execution.
Minimize complex integration
and risks.

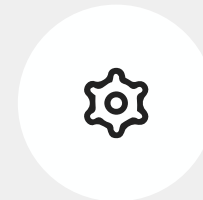

Support

Full technology transfer by
competent and experienced
experts

Support according to
manufacturer's standards

Dedicated and remote support
according to Customer's
request.

Why Bavaan

We talk about solutions, not problems.

Flexible Engagement Models

Please review and choose the main types of interaction models in software development provided by Bavaan.

Fixed Price

- A fixed, pre-agreed budget for the entire project.
- Scope, timing and deliverables are clearly defined.
- The service provider will manage the risks.
- Limited flexibility for scope changes while the project is underway

Project Outsourcing

- Fixed hourly price
- According to technical expertise/domain
- The customer authorizes the entire project to the developer.
- Determine scope, schedule and deliverables.
- Service provider for managing project resources and development processes.
- Usually includes a project manager on the service provider's side to coordinate tasks.

Dedicated Team

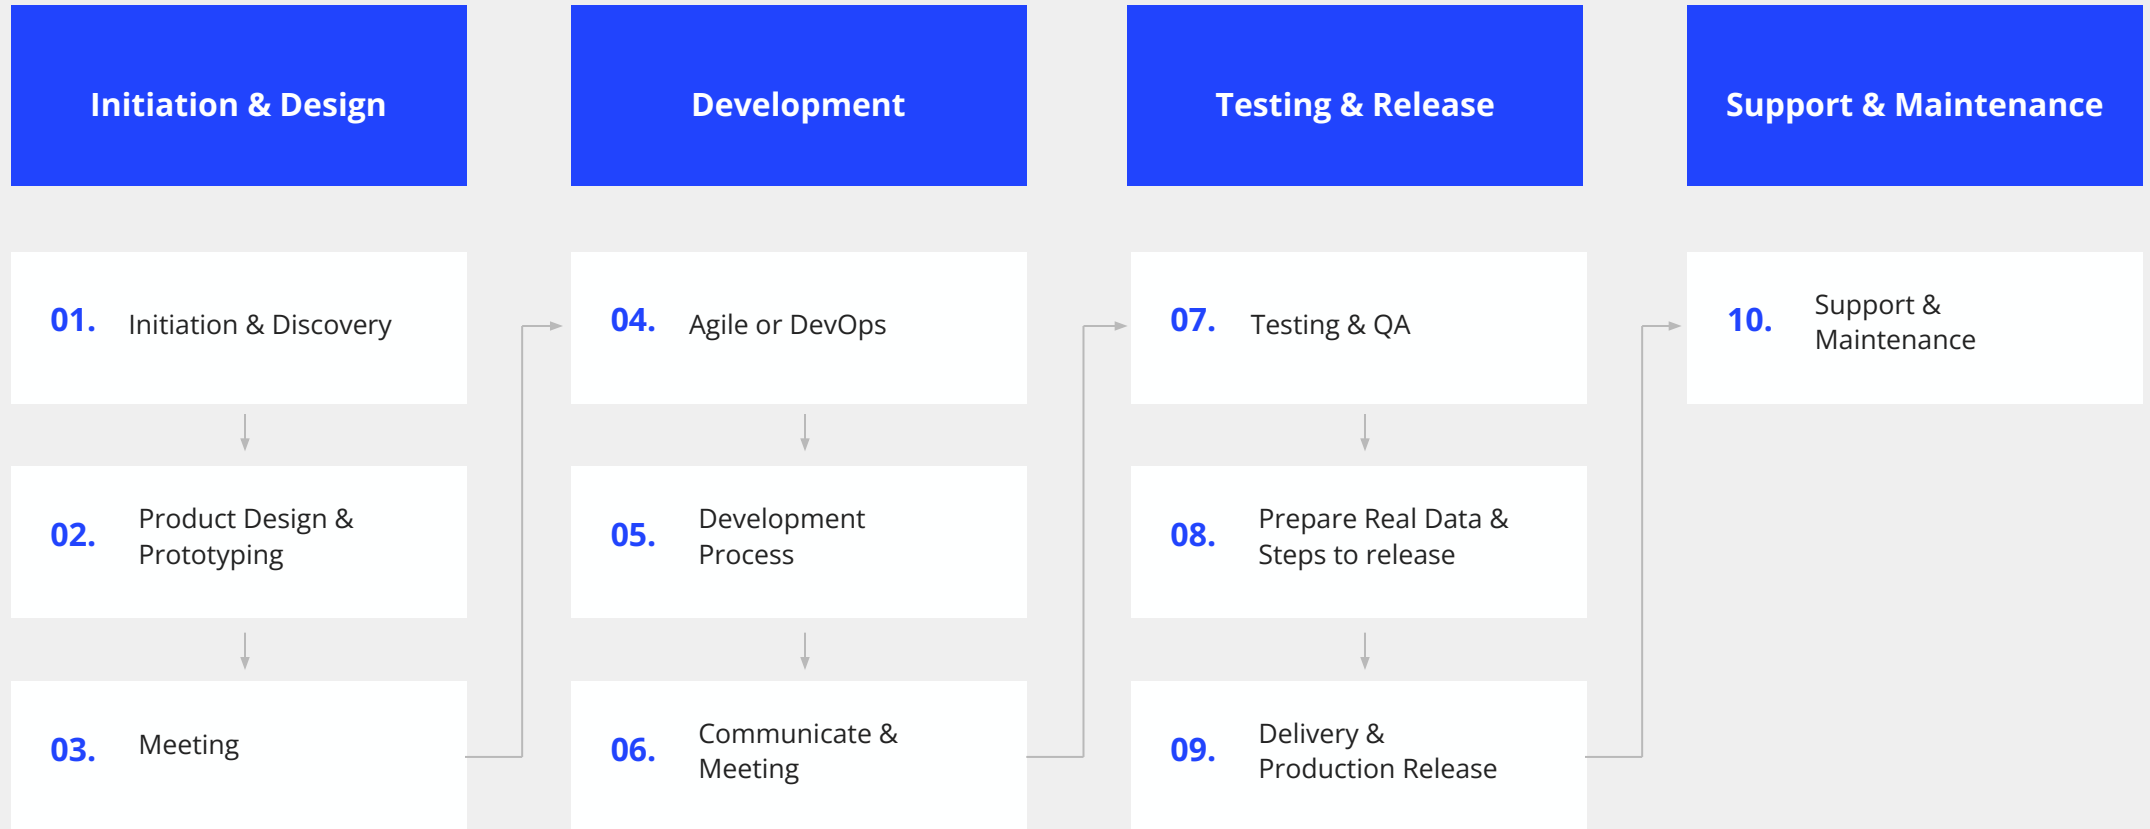

- Full-time development team for the project.
- Directly managed by customers
- Scale up easily
- Agile project management with continuous collaboration
- The client has significant control over team composition and project direction.

IT Outstaffing

- Access to quality, verified engineers.
- Significant cost savings.
- Adding staff to the customer's existing team.
- The service provider manages the administrative and human resources aspects of the contingent workforce.
- Employees can be fully integrated into the customer's internal processes.
- Flexibility to increase or decrease team size based on project needs.

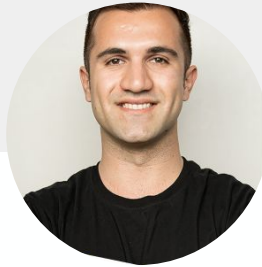

Our Process

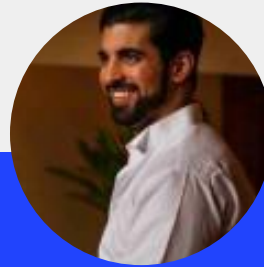

Our Testimonials

CLARK BEL

CEO

I have been cooperating with Bavaan in a Magento project for my US clients. They are smart consultant with nice support team. Thank you, guys!

Ramon Zablah

Project Manager

This by far has been the best support service we have ever received. Fast, friendly and accurate. Extensions work as described.

DOROTHEA

Business Manager

We have worked with Bavaan for about 2.5 years and have always found Highly scalable, robust, and end-to-end eCommerce solutions by them.
